

# \$16 Bracelet

Design by ?

Diagrams and photos by Eric Strand

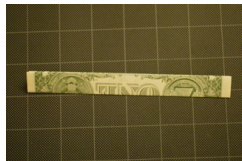

1. Valley fold bottom to top, unfold.

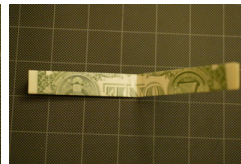

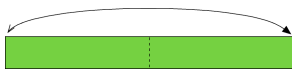

*Plan what designs you want on the final model. The side shown in the final model will be opposite of the side you start facing you. Sixteen modules provide a good size range. And a good 16th present.*

2. Valley fold top and bottom edges to center.

3. Valley fold on center crease.

4. Valley fold edge to edge, unfold.

*How you orientate the bill before this fold determines which pattern will show in the final model.*

5. Valley fold edges to center.
