6. Mountain fold all vertical creases, unfold.

7. Unfold flap from step 5.
   Leave border fold in place.

8. Valley fold on diagonals, unfold.
   You can reverse the fold from step 5 to help with this step as shown in the first photo. Pinching the vertical fold down to this new mountain fold will help set the corner of the crease. Fold the first segment along the diagonal as well.

9. Valley fold flap up on existing crease.

No Diagram

10. Roll up model.
    Notice the wrap-around tuck in the second photo to help lock the model.
