

Lid for Hexagonal Box

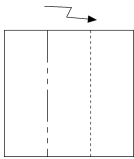

Design by Jim Cowling and Helen Sperber
Diagrams and photos by Eric Strand

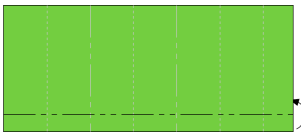

1. Start green side up. Valley fold so raw edge bisects the I in America.
Since this model uses printed landmarks on the green side of the bill, choose one with even borders. Don't set the creases in steps 1-3 too firmly as you may need to adjust them slightly after step 3.

2. Valley fold raw edge to folded edge.

3. Fold into thirds, unfold completely.
Use your favorite method. The goal is six even segments and one shorter seventh segment. Mountain / valley orientation is unimportant. You may need to fudge the creases you've made to get equal segments.

4. Mountain fold just under the word "ONE" on the corner of the bill.
